DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the pipe shower must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: The cooperative relationships showing how the etch module, rinse module, transfer module, strip module, cleaning module, loader, and the unloader are connected.
- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1763

5. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear how the pipe shower functions to prevent the substrate from drying. Also, the appearance of the pipe shower is not known.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1, 3-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by DeOrnellas (U.S. 5,672,239).

Referring to Figures 1 and 2, and column 3, lines 7-31, DeOrnellas discloses an integrated processing apparatus comprising two etch modules 20 and 22 (etching line), strip module 24 (stripping line) and rinse module 25 (cleaning line) on the stripping line. Note.

Merriam-Webster's Collegiate Dictionary states that, "the word "on" is used as a function word to indicate position in close proximity with". Load lock chamber 16 (loader) holds the wafers before processing and atmospheric cassette module 34 (unloader) holds the wafers after processing. Furthermore, the atmospheric cassette module 34 contains a robotic wafer handling system 32 for transferring wafers. The vacuum chamber 26 connected to the load lock chamber

Application/Control Number: 09/740,830

Art Unit: 1763

16 uses a robotic wafer handling system 38 for transferring the wafers from each of the various modules.

After the wafer is etched, a pre-strip rinse step and spin-dry step takes place in the rinse module 25. This prevents corrosion and the oxidizing of residues into insoluble oxides during photoresist stripping. Likewise after the stripping process, the wafer undergoes a final rinse and dry step (col. 4, lines 5-16).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 2 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeOrnellas (U.S. 5,672,239) in view of Toshima (U.S. 6,007,675).

DeOrnellas fails to teach an elevator for conveying the substrate fro the stripping line to the cleaning line.

Referring to Figure 6a and column 21, lines 40-65, Toshima teaches that it is well known to move wafers from a dry-stripping module 6000 to a wet-cleaning module 7000 using a wafer elevator car 1401 of a wafer elevator 1400. This mechanism, like a robot arm or conveyor, allows the wafers to proceed to next processing module without interruption. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the apparatus of DeOrnellas with an elevator as taught by Toshima. This would allow the wafers to proceed to next processing module without interruption.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michelle Crowell whose telephone number is (703) 305-1956.

The examiner can normally be reached on M-F (8:00 - 4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Gregory Mills can be reached on (703) 308-1633. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9310 for regular

communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0661.
